3.0 Material Resources and Transportation

3.1 Additional Transportation Needs – Groupe Renaud Inc. – Jewish General Hospital

The Director of Material Resources and Transportation advised that normally there are twenty (20) students transported to the Jewish General Hospital in four minivans, five students per minivan, but due to COVID-19 this number has been reduced to sixteen or four students per minivan so once this number is exceeded an additional vehicle is required.

The Director of Pedagogical Services noted that the nature of the Jewish General Hospital Day Program is that it is a therapy program with an educational component. The program services the greater Montréal area and there is not a set number of places so when a call is received that a student has been accepted the school board needs make the necessary transportation arrangements.

In response to a question from Commissioner Guy Gagnon, the Director of Material Resources and Transportation noted that the additional minivan is required because the number of students being transported has exceed sixteen.
